Your email acc. REACH regulation no. 1907/2006/EC

Dear Mr. Asrud.

As we receive a very lot of REACH-requests from our clients we are sorry but not able to fill out all these individual questionnaires. Therefore please find following our statement.

In accordance to the REACH-regulation our company druseidt is a so named "downstream user". And because we ourselves are neither importer nor manufacturer of any substances or preparations in sense of the REACH-regulation we do not have to require a registration.

To ensure our ability to deliver we also contacted our suppliers. At the current state of knowledge we will not expect any delivery-problems for our products because of the REACH regulation.

Besides none of our products contain ingredients with more than the maximum allowed concentration of actual listed substances of Very High Concern (SVHC).

We hope that a.m. explanation answered your questions. In case you need any more information please send an e-mail to reach@druseidt.de.

Yours sincerely

Paul Druseidt
